DOOR OPERATOR
& ENTRANCE PARTS

FEATURES

Experience seamless parameter adjustments and diagnostics with our latest innovation, the **Smooth Operator**.

Featuring an intuitive on-board LCD display that simplifies setup, reducing field labor and ensuring maximum efficiency.

ADVANTAGES

- ★ Identical footprint application, fit, form and function, for replacing MOVFR 1 & 2.
- ★ On-board LCD display - parameter adjustment in real time "no hand-held tool required for parameter adjustment".
- ★ On-board LED function indicators.
- ★ Universal input voltage - no plug-in modules required, reducing maintenance cost.

PCB & DRIVE BENEFITS

1. LCD Programmable and Rotatable display.
2. No handheld tool required.
3. Universal input voltage.
4. No modules to choose at order point.
5. Control Board contains no problematic removable modules or relays.
6. No additional parts needed to purchase for door detector as it's enabled through the LCD Display.

MECHANICAL DESIGN BENEFITS

1. Identical footprint to MOVFR 1 & 2.
2. Universal linkage for multiple opening sizes.
3. All components are interchangeable with MOVFR.
4. Mounting holes on tracks for multiple size openings can be cut to smaller size.
5. Offered with fixed flag or clutch activated door restrictor.
6. Nickel plated chain is more corrosion resistant.
